Anthony Nguyen

Vancouver, BC • (236) 234-7843 • hoangan.np@gmail.com • LinkedIn • E-portfolio

PROFILE

- Current data analytics student and research assistant in Chemistry Lab of Langara College.
- Former R&D engineer in semiconductors from Taiwan with 5+ years of experience in data analysis and chemical engineering.
- Track records in statistics proficiency, RDBMS management, programming in R and Python, machine learning, dashboard visualization, AWS cloud service (Bedrock, E3, etc.).

EDUCATION

Data Analytics, Post-degree Diploma • Langara College • Vancouver, BC   Sep 2023 – Dec 2024
- Dean's Honor Roll recipient for outstanding academic achievement. GPA 3.69 out of 4.0
- Statistics, data mining, EDA, data manipulation. Programming languages (R, Python). Machine learning, deep learning (scikit-learn, Tensorflow). Data visualization (Tableau, PowerBI). API on LLMs, Generative AI (BERT, GPT, langchain). Database management (postgreSQL)

Master of Science, Biotechnology • Cheng Kung University • Tainan, Taiwan   Feb 2018 – Feb 2020
- Distinguished International Student Scholarship recipient. GPA 4.05 out of 4.0
- Structural biology and molecular assays for drug development. Cloning, qPCR, gel electrophoresis, cryo-EM, ITC, microarray, X-ray crystallography

PROJECTS

ASD positive classification by 3D brain MRI using ML and deep learning (Langara College)
Github: https://github.com/realanguyen96/3D_brain_MRI
Skills: Python, machine learning, deep learning, supervised classification
- Replicated study from Nature Communication by Vogelstein et al. (2021).
- Multiple dimension reduction methods comparison (LOL, RP, PCA, LDA). Evaluated 3D CNN performance vs machine learning classifiers (RandomForest, LDA).
- Building predictive ML model for ASD positive cases that had accuracy up to 60%.

Automation program for chemical data processing (Applied Research Center - ARC) – NDA included
Skills: Python, MS Excel, HPLC-UV, GC-MS, transformation, software integration, statistics
- Writing, debugging python-based applications to process, extracting target information automatically from analytical instruments' results in workbook format (MS Excel)
- Using feature selection algorithms to identify significant parameters for different methods comparison

Image annotation by CNN and NLP modeling to predict tweets sentiment by Gensim (Langara College)
Github: https://github.com/realanguyen96/image_annotation
Skills: convolutional neural network (CNN), natural language processing (NLP), word cloud, embedding

- Tensorflow CNN model was trained by CIFAR-100 dataset for input image recognition
- Text-to-embedding by Gensim library, classifying tweets at various sentiment levels from 1 to 5 with 50-74% accuracy

ML classification pipeline for fatality prediction on ICU patients (Langara College)
Github: https://github.com/realanguyen96/eICU_database
Skills: SQL, snowflake, Matplotlib, Seaborn, feature selection, dimension reduction, cross-validation

- Replicated study from J Per Med by Na Pattalung et al. (2021) using eICU database
- Database uploaded to cloud-based tool (snowflake) and extracted by SQL query
- EDA, data manipulation, imputation by ML. Final classifier model has accuracy up to 60%

PROFESSIONAL EXPERIENCE

Research Assistant • Applied Research Center • Vancouver, BC   Oct 2023 - Present

- Successfully optimized and statistically validated new methodology for purification and quantification of organic compounds in hops with 30% higher accuracy, 2x shorter run time
- Developed automated data processing pipeline for output data from GC-MS, HPLC-UV, Q-TOF.
- WHMIS and Lab Safety certificate for safety protocols, chemical handling, record maintenance.

Research and Development Engineer • Xintec Technology • Taoyuan, Taiwan   Nov 2022 – Jul 2023

- Module R&D in-charged of developing new recipes for electroplating (thin-film) and printing (bonding) processing on 8" and 12" Si wafer, mainly for CMOS optical sensor devices.
- Monitored pilot runs and supervised quality control to achieve refinery strategies using warehouse and production control systems (MES, ERP, SPC)

Research and Development Engineer • Everwide Company • Douliu, Taiwan   Mar 2020 - Oct 2022

- Extracted relevant data for experimental design and identified data trends to develop new epoxy resin products customized specifically for client's requirements.
- Researched literature and pattern review

Data Analyst Intern • Olam Vietnam Ltd. • HCMC, Vietnam   Jul 2015 - Feb 2016

- Descriptive analysis, EDA and hypothesis testing using statistical approaches (ANOVA, two-way t-test, etc.) in MS Excel and JMP to develop export strategy for Olam Ltd.

MICRO-CREDENTIALS

- Complete Guide to Power BI for Data Analysts by Microsoft Press (LinkedIn Learning)   Sep 2024
- PostgreSQL Essential Training (LinkedIn Learning)   Sep 2024
- Python Data Analysis (NASBA)   Jul 2024
- MS 365 Essential Training (Word, Excel, PowerPoint)   Sep 2023
